

World class winches

The company

Sepson is one of the leading manufacturers of hydraulic vehicle-mounted winches in Europe. Starting at the beginning of the last century, Sepson winches spread out around the world and are now performing hard duty pulling work with extreme reliability under all conditions, including tropical heat and arctic cold. The master smith Sars Erik Petterson founded Sepson in 1900 in the middle part of Sweden to make tools and handling equipment for the surrounding forestry industry, where pulling and lifting are key activities. Through a centuries-old tradition of skilled workmanship this part of Sweden has become a centre of industrial activity. Combining this tradition with high technology and informed care for the natural environment has become a hallmark of Swedish business. Today Sepson manufactures a state of the art range of winches with an EN ISO 9001 certified quality system.
