

HYDROFORMING
DESIGN LIGHT

Our leading technology

- Through hard work and big investments over the past 7 years a unique and very cost effective technology has been developed for hydroforming.***
- In the past Hydroforming has been more or less exclusive to those industries working with very large series (automotive) or industries able to pay the bills (aviation) this will now change!***
- Our machine-construction has an, all other factors equal, investment cost wich is a fraction of what can be found on the market.***
- Our tool-patent enables us to manufacture very low ost tools suitable for long series production.***

Our capacity

- Complete workshop for hydroforming in Vansbro, Sweden.***
- In house advanced simulation and design capabilities through Autoform. And of course conventional CAD-programs.***
- In house tool design.***
- Exeperience from a multitude of industries including automotive***
